

History and Archives Report
MBA of Texas
November 11, 2020

As with much of the work of the churches of the MBA of Texas, our gathering together has been limited. We are happy to report that good work has been done this year to preserve and make available the history of our people. This has been done in large part by Brother Paul Clark, one of the clerks of the MBA of Texas. Since moving the MBA of Texas website to his server, he has added more historical content.

All 120 years of the minute books of our state work since 1900 are currently assessable via the web on our state site. These were previously only available on CD or USB format and were impossible to keep up-to-date. We are thankful that they are now available online. The more permanent formats are also still available upon request.

The health of the long standing member of our committee, Brother Donald L. Britton, has been serious this year. He has continued to make every effort to continue to serve in his various responsibilities. We are thankful for his many years of faithful service and remember him in our prayers.

The museum next to the campus of TBI continues to be maintained. Brother Curtis Gilbert has stepped up to oversee and in many cases has done this work. We also appreciate his faithful care in maintaining the treasury of the committee and paying the expenses.

Respectfully Submitted,
Michael D. Thompson
Chairman
History and Archives Committee
